générations
FUTURES

As every year, Pesticide Action Week is accompanied by the Artists' Seed Challenge. This challenge is an opportunity for children and teenagers to imagine healthy agriculture and food for tomorrow.

GAME RULES

Schoolchildren can take part. A teacher/educator can register his/her class/extra-curricular group/club. Individuals can also register.

You have until **March 30, 2024** to create a work on the subject, in the format of your choice: drawing, sculpture, photo, video, music, writing...

Once you've made your creation, share a photo or video of it on the social network of your choice by "tagging" the SPAP account @SemaineAlterPesticides on Facebook, @Alter_Pesticide on Twitter, @alternatives_pesticides on Instagram and making sure the publication is public. You can also add #SPAP2024, #AlternativesPesticides and #ConcoursGraineDArtiste2024 to make it easy to find you.

The event organizers will select the best entries in each category (schools on one side, secondary schools on the other, individuals), and the winners will receive prizes from our partners!

All information will be published on :
<https://www.semaine-sans-pesticides.fr/concours/>
